Planetary Symbolisms and Symbols

A star, also called Sol, is the source of most life in the Earth. It is the most important body not only in the Solar System, but also in an astrological chart. This is what is being represented by the chart, i.e. the person or entity whose birthchart is being considered. It is the essence, spirit or life force. It also rules the circulatory system and the heart, both essential to life.

It only occurs in the geocentric chart where we view the Solar System from the Earth's perspective. The Sun appears to be moving, but it is actually the Earth's movement that we are observing. If we walk past a tree we perceive the tree to be moving in relation to us, but it is actually us that is moving.

In the longitudes it moves about one degree per day, but in the declinations it moves fastest around the Equinoxes (March and September) and slowest during the Solstices (June and December). The up-down movement of the Sun in the declinations as it oscillates from North to South gives us the seasons of the year. All planets move like this in the declinations, but it is only the Sun that has such a marked effect on our environment.

The satellite of the Earth rules emotions, the unconscious, and urges. It also symbolizes the soul, crops, food, the ocean, water, habits, instincts, feelings and vulnerability.

It is a very personal planet and represents the past, nostalgia, withdrawing for protection, following tradition and maternal love. Although the Moon is an important planet in astrology, we can only include it in the birthcharts if the time of birth is known.

This is because it moves so fast and without the time of birth we can't be sure of where it is in the chart. It moves over 10 degrees per day in the longitudes and also varies in speed in the declinations like the Sun.

Planetary Symbolisms and Symbols

This planet was known by our ancient ancestors even though it often can't be seen because it is in the Sun's glare. The ancient symbolisms are consistent with those that we use. It also rules transportation, swiftness, music, teaching, poetry, movies, intelligence, travel, exploration, respiratory and nervous systems, calculators, computers, design and sense of balance. Traditional astrologers say that when Mercury goes retrograde (or apparent backward movement) that there are problems with communication and travel. Pluto can be power-hungry, selfish and abusive, but it also elevates and can bring great success. It is both a sexual and financial planet. It rules the sexual organs, lust and the sex act, but there is no romance here, just sex and sometimes obsessive desires. On the financial side it rules big business, entrepreneurs, competition, financial trade, profit, gambling, banking industry, loaning money, financial instruments, investments, bonds and mortgages. This planet also rules atomic energy and weapons, power and things that preserve or enhance power. It is the planet of male chauvinism and can be authoritarian, but also cold and prone to excess. It is an important planet for professional competitive sports and is perpetually dissatisfied.

Planetary Symbolisms and Symbols

Chiron is a very interesting body and is quite controversial. It was discovered in 1977 and is considered by astronomers to be both a comet and an asteroid. To Magi Astrologers it rules very important things. For example, marriage, significant emotional ties, the family, spouses, children, karmic bonds, public image, career and earning power. It is symbolic of authentic charisma and freedom (Uranus is the urge to be free but not freedom itself). This body is controversial in astrological circles because traditional astrologers say that it symbolises the "wounded healer" because of the myth of the Centaur that Chiron is named after. However, from statistical work done on thousands of charts, the Magi Society has found this not to be true. This is a good example where the myth and symbolism of a planet differ.

Planetary Symbolisms and Symbols

Another asteroid, this one was discovered in 1804 and a late friend of mine used to call it the "rock 'n roll planet" because it rules sex and drugs; specifically the rock 'n roll lifestyle, addictions, sexual charisma, casual sex, emotionless sex, adultery, marriage without children, illusions, delusions, dreams, fantasy, misinformation and false love. The charisma that Juno imparts is like a spell that only lasts for so long, once the spell is broken then the charisma is gone.
